Your organization's new CX unified messaging system is designed to provide you with the same convenient access to your voice, fax, and email messages whether you are at your desk or calling in over the telephone. When you call in, the Meridian Mail® / CallPilot® emulation saves you the effort of relearning most of the keystroke commands you use to send, retrieve, and manage messages.

If you are looking for a quick hint on how to perform a specific task, here is the list of the shortcut commands.  
\* Depending on how your CX system is set up, this command may not be available. Please consult your system administrator for additional information.
