SETTING PRIORITY LEVELS FOR REQUESTS

The Help Desk will make every effort to resolve issues at the time of the service call. This will be the initial method for resolving issues before assigning a priority level. Help Desk staff will log and assign priorities for all requests not resolved at the time of the call, based on specific definitions. Requests will be handled according to the priority assigned to them.

The following table describes the priority levels assigned to requests for hardware/software problem resolution with associated response and completion time commitments:

| High | A problem with no known workaround that affects a single user. | Within 2 hours | Within 1 working day | |
