Introduction

In order to understand the reasons for summer course enrollment, a survey was sent to undergraduate students registered for summer 2020 classes. A total of 233 students responded, or 14% of the 1626 students enrolled at the time of the survey. Distribution of responses by class level and department are below.

Class Level	Students Completing	Enrolled Students	Percent Completing
Freshman	25	199	13%
Sophomore			
	4	28	14%
History	3	17	18%
Mathematics	5	20	25%
Media Arts	0	16	0%
Music, Dance & Theatre	5	54	9%
		62	16%
Women and Gender Studies	0	6	0%
World Languages and Cultures	1	7	14%
Business	61	423	14%
Accounting	16	102	16%
Business Administration	0	4	0%
Economics	0	5	0%
Finance	6	65	9%
Management	28	186	15%
Marketing	11	61	18%
Education	15	69	22%

- Due to the pandemic the CDC requires everyone to be 6 feet away from one another . there is sir not enough room to do that if we have face to face classes. Classes are filled with more than 20 students , we would need to ha classes outside to insure the 6 feet rule. Another concern for me is that people using public transportation being exposed to what ever and bringing it in the classroom to expose more people. The cleanliness of desk/table/chairs, will there be people c in the classrooms cleaning everyday? especially when many professors hold classes in the same room through the day. will they clean everything after each class has ended.

- For science majors is extremely hard to learn online. Due to multiple distra at a home setting or the accessibility of phones during lectures, not to mentions the labs.. I would prefer to have my lectures and labs in person 100%

- For the fall I would prefer to take online classes only because of the COVID. I think it is too s to go back in September. Everything is moving far too quickly.

- Honestly, due to COVID19 we should take precautions until there is a cure as in the vaccine to not endanger students and being afraid of catching the virus. I prefer to be online until then.

- I have taken one blended course at NJCU and I loved it. Every other week for 6 weeks then the rest online. I feel that should be offered more in the fall and spring. I love taking online courses here as well and I really advise that you consider offering graduate programs as well. In-face classes I would prefer to take for my major required classes, especially in math related courses.

- I prefer face-to-face classes, however, due to Covid

- The type of class I desire depends on how the professors structure the course, but overall face-to-face seems the best since some online teachers are too broad in their requirements and expectations. Online courses need specific instruction, and most professors online fail to do that.
